Intelligent Medical Software (IMS) 12 is a CCHIT Certified 08 Ambulatory EHR

Practice Profile

Specialties:
Allergy, Asthma & Immunology

Software Replaced:
WinMed PM

Office Locations:
Dallas, Texas
Plano, Texas

About North Texas Allergy & Asthma Associates

North Texas Allergy & Asthma Associates was founded by Dr. Harvey Black in 1927. He was a President of the American Society of Clinical Pathology, and in 1945 coauthored the textbook "Practice of Allergy."

In July 2004, Dr. Sandeep Gupta joined the practice after completing his Allergy, Asthma, & Immunology training at the UCLA/Veterans Administration Health Care System. Before that he served as a Clinical Faculty member at UCLA and was on staff in the Department of Internal Medicine at Cedars-Sinai Medical Center. He completed his residency at Cedars-Sinai Medical Center in Los Angeles and is a graduate of the University of Southern California Keck School of Medicine. His areas of interest include rhinosinusits, asthma and angioedema.

"Meditab did a great job on the implementation. I think the support is the most appreciated part of IMS. The templates are very good and our revenue cycles have improved. We're getting more money in and having more success collecting our claims. The integration, shot records and templates are also very well designed."

Dr. Sandeep Gupta, North Texas Allergy & Asthma Associates

North Texas Allergy & Asthma Associates have been around since 1927—making them one of the oldest in the country. They had been using their previous practice management software for 6–7 years, but it didn't integrate with electronic medical records or allergy shots. Also, according to Dr. Gupta, "Meditab's superior billing was one of the main reasons we switched over. Our payment of claims and rejections were all pretty messed up." In addition to this, they'd grown tired of having to step out of their rooms to view shot records. It was time for a change.

Business Challenge

In addition to the critical issues that needed to be addressed, North Texas Allergy & Asthma Associates were dealing with other document management challenges. With two office locations in Plano and Dallas, Texas, faxing data was a big problem. Tracking was not very good and they couldn't access data from home when it was needed either. The overall practice efficiency needed a shot in the arm.

The Solution—Meditab's IMS for Allergists

- Meditab's IMS for allergists—a fully integrated scheduling, EMR, billing and Immunotherapy solution
- "Very well designed" shot records and customizable templates that can be billed out automatically
- Improved quality of care with better tracking, better accessibility to data and secure access from home
- Robust support described as one of "the most appreciated parts of IMS"
- Improved workflow and overall efficiency including more revenues and better success collecting claims

Intelligent Medical Software (IMS) 12 is a CCHIT Certified 08 Ambulatory EHR

"When we needed integration with an EMR, PM and Immunotherapy, Meditab's IMS for Allergists was the best solution on the market.

The shot records are very well designed and I don't have to step out of the room to see them."

—Dr. Sandeep Gupta

The Results

By switching to Meditab's Intelligent Medical Software, North Texas Allergy & Asthma Associates has turned the page on a new chapter of their success. One of the oldest practices in the country has gone fully "electronic", putting all of the headaches behind them caused by document management, including manually faxing data back and forth between two office locations.

In addition to this improvement, there were none of the usual implementation headaches experienced with other vendors. According to staff, "Meditab did a great job. The support is the most appreciated part of IMS."

The quality of patient care has also self-reportedly improved due to better tracking and information availability including secure provider access to patient records from home.

Furthermore, billing that used to be described as "pretty messed up" with the previous software is now much better due to "more efficiency, fewer rejections, more money and more success collecting claims." Based on the experiences and comments from North Texas Allergy & Asthma Associates staff, it's clear that Meditab's IMS for Allergists has been a success in every sense.

About Meditab Software, Inc.

Meditab Software, Inc. is changing the face of healthcare around the globe. Before the age of twenty, the company founder had completed 6 years of college—reflecting the drive and dedication that continue to define Meditab today. The company was created in 1998 by collaborating with premier software developers and practicing physicians with the goal to provide an innovative suite of intelligent, integrated and intuitive software solutions supporting the primary process of healthcare delivery.

Meditab's revolutionary software solutions connect physicians, patients, labs, pharmacies and long-term care facilities nationwide. Providers are empowered with key knowledge that enhances the way they conduct business and serve their clients. Meditab's software solutions include: Intelligent Medical Software (IMS) v12, Intelligent Pharmacy Software (IPS) and Intelligent Radiology Management Software (IRMS). With any one of Meditab's integrated solutions, saving time and money becomes second nature and service continues to be the number one priority.
