

# Intelligent Medical Software™ (IMS) for Allergists

## A fully integrated EHR / Practice Management solution specifically designed to meet the needs of the Allergist / Immunologist

We understand the unique challenges of the Allergy Practice. AllergyEHR for Allergists' is uniquely designed so you can document environmental and allergy histories quickly as it creates custom treatment plans for patients with ease. Instantly document skin test results, create immunotherapy recipes in a dash, administer immunotherapy shots, track patients behind on shots, automatically bill shots, bill serum based on insurance protocols and obtain authorizations and consents prior to patients' anniversary cycles.

### Allergy and Immunology Templates and Workflow

AllergyEHR will streamline the entire documentation and patient charting process with our unique shot scheduler and skin test templates defining antigens, allergens, histamines, and diluents from a single screen. The template editor lets practices customize and add templates to suit individual preferences, allowing physicians to work as their particular practice and personal preferences demand. Templates feature intuitive pick-lists, and checkboxes to simplify documentation encouraging chart completion.

This fully integrated electronic health records (EHR) and practice management (PM) solution is ideal for the allergist, connecting them to patients, payers, medical devices, pharmacies, labs and other health care entities regardless of the practice size, specialty and number of locations.

Meditab IMS, v 14 is an

Ambulatory EHR

## AllergyEHR for the Allergist / Immunologist

- Simplify patient visits with allergy and immunology-specific templates for faster, more comprehensive documentation, storage, and retrieval of detailed patient data.
- Enhance workflow with a paperless office. Gain better communications, greater efficiency, and deliver better patient care.
- Improve overall revenue with accelerated reimbursement, automatic coding recommendations, decreased denials, and increased patient flow.
- Built-in reporting tools scrutinize your practice's patterns for pay-for-performance, meaningful use requirements, quality measurements, and business analysis.
- Access patient information at the point of care, no more chart-pulls, and no more misplaced records.
- Eliminate redundant paperwork, enable patients to complete forms with integrated patient portal, and in-office kiosk.
- Achieve interoperability and connectivity with other health care entities, pharmacies, and labs for referrals, orders, and results.
- Local ongoing support from a national team of industry experts -- AllergyEHR Authorized Partners, dedicated to serving the needs and interests of allergists.
- Automate prescription writing, drug interaction and formulary checking with automatic alerts, and a fully-integrated drug database.
- Easily deliver patient education materials for allergy-specific tests, procedures, and chronic disease management.

### Up to \$44,000

The Medicare and Medicaid EHR Incentive Programs will provide incentive payments to eligible professionals, (Chiropractors are eligible) as they adopt, implement, upgrade or demonstrate meaningful use of certified EHR technology.

**Purchase with Confidence** Meditab IMS is guaranteed to meet all of the ARRA meaningful use criteria and requirements or your money-back. How can we guarantee you'll be qualified for HITECH Act incentive payments?

### CCHIT Certification

Meditab IMS has received the most current CCHIT 2011 certification, and, as of September 30, 2010, IMS v.14 was recognized by CCHIT as a Stage 1 Meaningful Use certified Complete EHR with ONC-ATCB 2011/2012 Certification, meeting all criteria published by the U.S. Department of Health and Human Services (HHS) in the Final Rule.

### Easily Become a Meaningful User

Meditab IMS features a unique Meaningful Use Dashboard that quickly identifies meaningful use deficiencies. Review clinical data with graphical charts identifying patients not meeting clinical measures quickly and easily. Tasks, reminders, alerts and letters can be generated to improve meaningful use status.

**Registrations are open. Participate early to get the maximum incentive payments!**

The Skin Test module allows you to quickly document skin test results.

## AllergyEHR Allergy Specific Features

### • Shot Schedule Templates

Manage your patients' shots more efficiently with defined individualized template shot schedules, track build-up and maintenance shots, modify patient shot schedules as needed, and follow up with patients who have late or missed shots via email and letter templates.

### • Shot Template Based Skin Test

Quickly document skin test results when defining antigens, allergens, histamines, and diluents from a single screen. Easily record skin tests using wheal and flare or scores with access of previous test results.

### • Vial Management

Manage and track your vials with bar-coded labels for improved patient safety. Quickly create vials with different dilutions for desired concentrations and create lot numbers for tracking of diluents and antigens as well as inventory management.

### • Generate Recipes From Skin Test Results

Allows allergists to populate recipes based on skin test results while linking antigens with skin test allergens, creating multiple recipes from one skin test, and minimizing recipe errors.

### • Shot Module

Enhance patient safety and improve efficiency by documenting pre and post-injection questionnaires. Patient safety will be ensured with bar-coded vials, automated patient shot schedules, validations and warnings for expired vials, and/or early or late shot administrations, and useful reminders for future tasks, and color-coded shot histories.

### • Reaction Checking and Treatment

For quick documentation of reactions and any associated treatments. Document local and systemic reactions, no-reactions or unchecked reactions, define alerts and reminders for critical reactions, and "Link Care" plans for patient education.

### • Late Shot Follow-up

Identify patients missing immunotherapy ensuring better patient care and increased revenue. Easily generate reminders for late shot follow-ups via batch email and letters.

### • Automated Immunotherapy Billing

Generates the Super Bill for shots and treatments and provides flexible templates that bill for first visits, peak flow, skin tests and treatments along with serums and shots. Define serum billing rules by insurance and default CPTs, Modifiers, ICDs and Units to bill for immunotherapy shots.

## Real Return: IMS Manager™

- Reduce billing errors & denials
- Receive greater reimbursements faster
- Manage appointment requests centrally
- Payer Rules Maintenance
- Comprehensive Patient Tracking w/ Face-Time
- Save staff time & reduce administrative burdens
- Medicare logic-rules engine and insurance eligibility verification to assure accuracy and completeness

## Real Return: IMSClinical™

- See more patients
- Eliminate transcription costs
- Eliminate office expenses related to chart creation and paper document printing
- Qualify to receive HITECH incentive payments

## Benefits

- Works the way you do now
- Improve quality of care
- Easy adoption and use
- Decrease labor-intensive chart pulls and re-files
- Quickly access comprehensive patient information
- Communicate key information better and with more accuracy
- Improve and track overall progress of care
- Lower overall costs and better manage risk
- Share integrated information quickly and securely
- Deliver care summaries & other information required by Meaningful Use
- 24/7 live support
- Used to support practice of all sizes

## Why a Certified EHR?

To ensure that the system you select will allow you to qualify for Meaningful Use federal incentive payments, select a solution that is EHR Certified. Since there are few benchmark measures available to provide a level of confidence regarding specific EHR functions an EHR certification is very important.

The ONC-ATCB certification has been developed by the federal government to certify that an EHR system meets the technical requirements needed for a provider to become a meaningful user of an EHR system. The use of an ONC-ATCB certified product is required to receive any federal government incentive money for the use of an EHR system. The ONC-ATCB certification test script is very specific to EHR criteria that qualified providers must meet in order to participate in the government incentive program. There are two types of ONC-ATCB certifications; one for Complete EHRs and one for EHR Modules. A Complete EHR certification for Stage 1 Meaningful Use means that the EHR product has met all 33 criteria tested. Why piece together modules to meet meaningful use, select a certified Complete EHR such as AllergyEHR. According to CMS, eligible professionals, need to have all the capabilities in their selected EHR even if they're not using all the EHR capabilities.
